

More Room
...just Ahead!

creating storage solutions

Welcome

So you're in the market for more storage space! Look no further, we have you covered when it comes to customizing your storage space to meet your needs.

Storage buildings are becoming very popular for these very reasons,

- It is much more convenient and cost effective to have an extra storage building at your home than to travel to a storage unit across town.
- Home storage options are the most ideal way to reclaim garage or basement space, allowing you to organize and store your treasures neatly and safely.
- Easy to customize to your needs! Add a workbench, shelves, lofts, extra windows, doors and more. Make it blend in with your property landscaping!

great buildings for your animal needs!

Structure Detail

Delivery

Can you deliver to my site? Since every delivery is different here are a few things for you to check. Make sure there is good clearance! There should be 2 feet more than the total width of your new shed. Height clearance needs to be 14'.

What kind of equipment will be used? Make sure your site is accessible for our delivery truck, which will need approximately 24'. If we can't access your site with our truck we will use our Mule.

Customer is responsible for the following: The buyer is responsible to remove any tree branches, fences, or obstacles that are obstructing the truck or Mule from accessing your site. Driveways and gates need to be no less than 2' wider than the base of your shed, with a 14' high clearance. Buyer is responsible to get right of way clearance if access crosses over neighbors property. Trophy Sheds and the delivery company is not responsible for property damage due to weather or inadequate access to your site such as ruts or spin marks, broken tree branches etc.

Do I need a building permit? It is buyers responsibility to contact your local township or code officer and to obtain any necessary permits if needed.

built to last and delivered with a smile!
